

SPLIT BATCH | SAME BEER DIFFERENT YEAST STRAINS

One of the brewer's main tasks is to select and control a fermentation temperature that will cater to the selected yeast strain. In this side-by-side tasting, the beers have both been fermented at 20° C or 68°F. This temperature will yield proper cell function for a healthy fermentation and a tasty end product.

WLP001 California Ale Yeast® is the first to be offered by White Labs and is known for its clean flavors and hardy fermentations. Look for the emphasis on hop aroma and flavor along with a nice, soft bitter finish.

TASTING NOTES:

Melon | Candied Lemon | Guava

PAIRINGS:

[CHECK OUT OUR MENU](#)

Panzanella, Hot Chicken Sandwich, Margherita Pizza

This strain is similar to its WLP001 California Ale Yeast® counterpart due to its clean and quick fermentations. In this example it adds a touch more yeast-derived flavor known as esters. Look for a slight apple note in the finish!

TASTING NOTES:

Kiwi | Strawberry | Red Apple
