

American Light Lager

WHITE LABS BREWING CO.

SPLIT BATCH | SAME BEER DIFFERENT YEAST STRAINS

Beer drinkers that are looking for a low-calorie refreshing American classic, this beer is for you! Using our fermentation enzyme WLE4100 Ultra-Ferm, this enzyme (Amyloglucosidase) breaks down the carbohydrates (dextrins) into more fermentable sugars (glucose) to lower calories in the beer. Here you don't have to compromise taste for a low-calorie beer.

This strain makes dry and clean lagers with minimal sulfur and diacetyl production. This strain easy to work with and fitting for American-style lagers.
